RoomFood

Antonio Petrov, Audrey Wimmer, Ostap Malanyak, Viktoria Pernkopf

Basic idea

- Website for planning meals in shared households
- Schedule meal plans with recipes and ingredients
- A user can join rooms
- A room has an owner who manages it
- Meal plans are shared in a room
- Users can assign meals and ingredients to each other
- Users can share recipes
- Users have an overview of planned meals

Plans for sprint 1

- Basic login functionality
- Only planning for user themselves, no rooms
- Adding meals to your own meal plan
- Overview of planned meals
- Storing login info and meals in the database

Thank you for your attention.
